The batteries compartment can easily be opened without the use of any tools, leaving batteries accessible. A child may take a damaged or leaking battery and suffer burns due to the leaking chemical products. The toy is operated with 2 AA batteries (batteries are easily accessible) which fit almost entirely in the small parts cylinder. AA batteries are relatively large, it would be hard to swallow them, therefore it is assumed that it may just get stuck in a child's throat and cause injuries. / Directive 2009/48/EC on safety of toys; standard EN
