Product **Bath product**

Risk type **Chemical
Choking**

Due to their characteristic appearance, form, colour and size, the product may be mistaken for foodstuff. Small parts can easily detach from it, in particular if the product is bitten. A small child may then put it in the mouth and choke on them. Additionally, due to the product's composing ingredients, the small parts ending in the digestive tube can damage the health of the child.

The product does not comply with the Cosmetic Products Regulation and the requirements of the Food Imitating Directive.

Product

Particle filter mask

Risk type **Health risk / other**

The product bears a CE marking but its declaration of conformity is not complete; additionally, the appropriate warnings and instructions for use are missing. The particle/filter retention of the material is insufficient (measured values: as low as 85%); hence, the product does not fulfil the health and safety requirements. Furthermore, the mask does not properly adapt to the face. Consequently, an excessive amount of particles or microorganisms might pass through the mask, increasing the risk of infection; thus, even if combined with other recommended measures, it may not properly protect.

The product does not comply with the Personal Protective Equipment (PPE) Regulation and with the relevant European standard EN 149.

Category **Protective equipment**

Type **Consumer**

Description **Five white FFP2 NR protective face masks. The product is also sold online.**

Packaging description **The product is sold per blocks of five white, packed in a plastic bag printed red-white.**

Product **USB charger**

Risk type **Burns
Energy consumption
Fire**

The distance between the pin plugs of the product and the diameter of the metal elements of the plug are both inadequate, and the product has an input current more than 10% higher than the declared rated current. Consequently, the product consumes more energy than foreseen, leading to the product's overheating. This may increase the risk of fire, and a user could sustain burns when handling the overheated product.

The product does not comply with the requirements of the Low Voltage Directive and the relevant European standard EN 60950-1.
