Product

**Particle filter mask**

Risk type

**Health risk / other**

**The particle/filter retention of the material is insufficient (measured value as low as 89%). Consequently, an excessive amount of particles or microorganisms might pass through the mask, increasing the risk of infection if not combined with additional protective measures. As a result of the labelling, the mask may be worn in areas where hazardous substances are in use or during activities involving asbestos; since the mask fails to offer sufficient protection, this could lead to asbestosis with fatal consequences.**

**The product does not comply with the Personal Protective Equipment (PPE) Regulation and with the relevant European standard EN 149.**

Category

**Protective equipment**

Type

**Professional**

Description

**Protective respiratory filtration half-face mask marked with FFP2 / KN95 and with the CE 2834 marking printed on.**
