Product **Plush toy**

Risk type **Chemical
Choking**

The plastic material of the product contains an excessive amount of bis(2-ethylhexyl) phthalate (DEHP) (measured value up to 37% % by weight). This phthalate may harm the health of children, causing possible damage to their reproductive system. In addition, the suction cup can easily detach. If a child puts the product in the mouth, the suction cup can detach leaving the airways obstructed by the suction cup. Finally, the stuffing material of the product is easily accessible which, if ingested, could cause choking.

The product does not comply with the REACH Regulation, the requirements of the Toy Safety Directive and the relevant European standard EN 71-1.

Product **Passenger car**

Risk type **Injuries**

The parking brake (and its lever) cannot reach the intended position in damp and/or frosty conditions. As a result, the vehicle may not be secured against rolling away. In addition, the locking mechanism of the front hood can fail in the event of incorrect operation. This could cause the front hood to detach while the vehicle is being driven, posing a risk to the following traffic. Furthermore, the passenger airbag could cease to function in temperatures of below -20 and over +80°C. This could increase the risk of injury in the event of an accident.

The product does not comply with the requirements laid down in the Regulation on the approval and market surveillance of Motor Vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles.

Product

Watering strings

Risk type

**Chemical
Environment**

The green plastic of the product contains an excessive amount of diisobutyl phthalate (DIBP) and short chain chlorinated paraffins (SCCPs) (measured values up to 6.8 and 9.6 % by weight, respectively). DIBP may harm the health of children, causing possible damage to the reproductive system. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bioaccumulate in wildlife and humans, posing a risk to human health and the environment.

The product does not comply with the REACH Regulation and the Regulation on persistent organic pollutants (POP Regulation).

Particle filter mask

Corrigendum

A12/01580/21: in agreement with the notifying Member State's Authority, the information in this notification has been updated.

Risk type

Health risk / other

The particle/filter retention of the material is insufficient (measured values: as low as 84%). Furthermore, the mask may lack a nose clip, therefore it cannot be correctly adapted to the user's face. Consequently, the product does not fulfil the health and safety requirements; thus, even if combined with other recommended measures, it may not properly protect.

The product does not comply with the Personal Protective Equipment (PPE) Regulation and with the relevant European standard EN 149.
