Product **Toy rattle**

Risk type **Choking
Damage to hearing
Injuries
Suffocation**

The sound pressure level is too high (measured value up to: 118.6 dB). This could lead to partial loss of hearing, when the product is used. Furthermore, the toy releases small parts; a child may put them in the mouth and choke. The protruding shape of the toy keys is not compliant for children unable to sit unaided; they could lose balance and choke or suffer injuries. Finally, the plastic foil bag is too thin and poses a suffocation risk.

The product does not comply with the requirements of the Toy Safety Directive and with the European standard EN 71-1.

Category **Toys**

Product

Handheld smart phone for explosive atmospheres

Risk type

Burns

There are thermal ignition risks due to poor power limitation and design, which could lead to high temperatures on individual components. Excessive power and capacity could constitute potential sources of ignition due to possible sparking. This could lead to significant harm to persons or property.

Directive 2014/34/EU on equipment and protective systems intended for use in potentially explosive atmospheres Article 13(1)(b) is not complied with. No conformity assessment procedure within the meaning of the Directive has been carried out. There has been no type examination, and there is no quality assurance system to be tested by a notified body.

Category

Explosive atmospheres equipment

Type

Professional

Description

Mobile device for use in explosive atmospheres (ATEX device category 2). The product is also sold online.
