

Alert number **[A12/00555/22](#)**

Product **Passenger car**

Risk type **Injuries**

Corrosion of the bearing pin in the bearing bush can increase the frictional resistance of the bearing to such an extent that the vertical forces occurring are absorbed by the track rod itself. As a result, the track rod of the rear suspension system may break reducing the steering control of the vehicle and increasing the risk of an accident.

The product does not comply with the Regulation on the approval and market surveillance of motor vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles.

Product

Air blaster

Risk type

Injuries

The product's safety valve does not correspond to the safety levels requested for this type of pressure equipment, and the welds are inappropriate. Moreover, neither the pressure tank nor the safety valve have a permanent marking for the maximal permissible operating pressure or safety pressure, and the manometer does not have a red warning mark. Furthermore, the product is supplied in parts for self-assembly, but without instructions to do so. Instructions for the product use are not fixed to the product's parts, but may be attached by the assembler. The pressure vessel may burst and parts of the product can hit users and bystanders causing serious injury.

The product does not comply with the requirements of the Pressure Equipment Directive.

Category

Pressure equipment/vessels

Product

Bracelet with pendants

Risk type

Chemical

The product contains excessive amounts of cadmium and lead (measured values: 90% and 4.3% by weight, respectively). Cadmium is harmful to human health because it accumulates in the body, may damage the kidneys and the bones and is carcinogenic. Lead is harmful to human health as it accumulates in the body, can induce developmental neurotoxicity and can also harm unborn or breastfed children.

The product does not comply with the REACH Regulation.
