Product

Double tip felt pens

Risk type

Chemical

The felt pens' inks contain a mixture of the preservatives methylchloroisothiazolinone and methylisothiazolinone (MCI/MI, measured values: up to 5.2 mg/kg and 7.3 mg/kg, respectively). Dermal contact with MCI and MI containing products can provoke allergic contact dermatitis to sensitised persons.

The product does not comply with the requirements of the Toy Safety Directive nor with the European standard EN 71-10 and EN 71-11.

Product

Particle filter mask

Risk type

Health risk / other

The product bears a CE marking but its filtering capacity has not been tested by a relevant competent European conformity assessment body. Consequently, it is not proven that the product fulfils the health and safety requirements; thus, even if combined with other recommended measures, it may not properly protect.

The product does not comply with the Personal Protective Equipment Regulation and with the European standard EN 149.

Category

Protective equipment

Type

Consumer

Description

Protective respiratory filtration half-face mask. The mask is marked with both FFP2 and KN95 indications, and has the CE marking printed on the side.

Packaging description

The product is sold in a white and blue plastic pouch, containing 2 items, and with user information printed on the back only in (presumably Chinese) characters. A label with the reference to standard EN 149, both claims FFP2 and KN95, and with the CE marking, is attached on the bottom rear side.

Product

Liquid for electronic cigarettes

Risk type

Chemical

The product contains diacetyl (measured value: 34 mg/l), but it is not indicated in the list of ingredients. Diacetyl is toxic if inhaled, causes damage to organs through prolonged or repeated exposure, is a highly flammable liquid and vapour, is harmful if swallowed, causes serious eye damage and causes skin irritation. The user also has no information to avoid the dangers incurred when the product comes into contact with the skin or if it is ingested.

The product does not comply with the requirements of the Tobacco Products Directive.

Alert number **[A12/00656/22](#)**

Product **Passenger car**

Risk type **Injuries**

The drive shafts installed in the vehicles concerned were coated with a lubricant which accelerates the wearing of the protective layer covering them, making them more susceptible to damage caused by road debris. Furthermore, grit containing de-icing agents used to maintain the roads could accumulate in damaged parts of the drive shafts, increasing corrosion and the risk of breaking at high torque. Both situations increase the risk of accident/injury for passengers and other road users.

The product does not comply with the Regulation on the approval and market surveillance of Motor Vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles.

Product **Passenger car**

Risk type **Injuries**

Certain spot-welds were missed during the welding of the body panels to the left and right front shock absorbers. As a result, cracks and breakage may occur on other spot-welds and/or on the body panels around the front shock absorber mounting areas. This could cause a front shock absorber to separate from the mounting area, resulting in a loss of vehicle driving stability, increasing the risk of an accident.

The product does not comply with the Regulation on the approval and market surveillance of Motor Vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles.

Product

Disposable electronic cigarette

Risk type

Chemical

The product contains more than the maximum permitted amount of liquid (measured value 3.3 ml). This could lead to the accidental consumption of a high dose of nicotine. Nicotine is acutely toxic in high doses and its inhalation can cause adverse effects on the health.

The product does not comply with the requirements of the Tobacco Products Directive.
