Product

Plastic Dolls with accessories

Risk type

Chemical

The head of the doll contains bis (2-ethylhexyl) phthalate (DEHP) (measured value up to 30,5% by weight). In addition the doll's shoes contains 1.73 % by weight of bis (2-ethylhexyl) phthalate (DEHP) and 0.2 % by weight of Di-(butyl) phthalate (DBP). These phthalates may harm the health of children, possibly causing damage to the reproductive system.

The product does not comply with the REACH Regulation.

Product

Lighting chain

Risk type

**Burns
Electric shock
Fire**

The product is marketed for outdoor use but it is not correctly insulated against moisture, and its outside casing can easily break and let water in the control unit and inside the socket for connecting additional sections. Also, the flashing control unit can break, allowing access to live parts, while the design of the plug and the auxiliary socket does not ensure a safe connection with other chains. Moreover, the wires are not sufficiently resistant, the electrical insulation is inadequate and the clearance/creepage distances between the primary and accessible secondary circuits are not sufficient, hence accessible parts may become live. A user may receive an electric shock. Furthermore, the power supply pallet may catch fire; a user may suffer burns.

The product does not comply with the requirements of the Low Voltage Directive nor with the European standards EN 60598-1 and EN 60598-2-20.

Fire**

The hair dryer does not have a thermal cut-out device. The plastic material of the casing is combustible. The hair dryer can overheat and catch fire during use causing burns to the user. The protective grille can fall out of the product on the air outlet side and live parts become accessible. The user may touch the live parts and receive an electric shock.

The product does not comply with the requirements of the Low Voltage Directive nor with the European standard EN 60335.

Product

Hair dryer

Risk type

**Burns
Electric shock
Fire**

The hair dryer does not have a thermal cut-out device. The plastic material of the casing is combustible. The hair dryer can overheat and catch fire during use causing burns to the user. The mains cable is not properly protected against pulling and twisting. Live (active) parts can be touched if the internal too thin conductor of the mains connection cable is broken or become free. The user may touch the live parts and receive an electric shock.

The product does not comply with the requirements of the Low Voltage Directive nor with the European Standard EN 60335.

Product **USB Charger**

Corrigendum

In agreement with the notifying authority, case A11/00087/22 has been updated with new pictures and screenshots.

Risk type

Electric shock

The clearance/creepage distances between the primary and accessible secondary circuits are not sufficient, which may result in a short circuit. A user could receive an electric shock from accessible live parts.

The product does not comply with the requirements of the Low Voltage Directive nor with the European standard EN 62368-1.
