Notifying country Sweden

Product category Electrical appliances and equipment

Type Consumer

Product Headphones

Name Wireless Headphones On ears

Packaging description White cardboard box.

Brand Unknown

Product description Black wireless headphones. Product sold online.

Risk type Chemical
Environment

Risk description The solders in the product have excessive concentrations of lead and cadmium (measured values: up to 45 % and 0.12 % by weight, respectively). Lead poses a risk to the environment. Cadmium is harmful to human health because it accumulates in the body, can damage the kidneys and bones and it may cause cancer. The plastic materials of the product has excessive concentrations of bis(2-ethylhexyl) phthalate (DEHP) and short chain chlorinated paraffins (SCCPs) (measured values: up to 1.9 % and 5.1 % by weight, respectively). This phthalate may harm the health of children, possibly causing damage to the reproductive system. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bio-accumulate in wildlife and

humans, posing a risk to human health and the environment. Prolonged exposure to them through the skin may cause cancer.

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directive), nor with the Persistent Organic Pollutants (POP) Regulation.

Product description White electric air disinfectant with USB cable. Product sold online.

Risk type Chemical
Environment

Risk description The solders in the product have an excessive concentration of lead (measured value up to 56%). The plastic material of the cable has an excessive concentration of lead, dibutyl phthalate (DBP) and of short chain chlorinated paraffins (SCCPs) (measured values: up to 0.3%, 2.6% and 5.2% by weight, respectively). Lead poses a risk to the environment. This phthalate may harm the health of children, possibly

causing damage to the reproductive system. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bio-accumulate in wildlife and humans, posing a risk to human health and the environment. Prolonged exposure to them through the skin may cause cancer.

Chemical

Risk type	Environment
Risk description	The solders in the product have an excessive concentration of lead (measured value up to 47% by weight). The plastic material of the cable has excessive concentrations of bis(2-ethylhexyl) phthalate (DEHP) and short chain chlorinated paraffines (SCCPs) (measured values up to: 0.36% and 2.9% by weight, respectively). Lead poses a risk to the environment. DEHP may harm the health by causing possible damage to the reproductive system. SCCPs persist in the environment, are toxic to aquatic organisms at low concentrations and bio-accumulate in wildlife and humans, posing a risk to human health and the environment. Prolonged exposure to them through the skin may cause cancer.
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product does not comply with the requirements of the Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directive) nor with the Persistent Organic Pollutants (POP) Regulation.
