

Important Notices and Disclaimers

IEEE documents are made available for use subject to important notices and legal disclaimers.

Notice and Disclaimer of Liability Concerning the Use of IEEE Documents

IEEE Standards documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. IEEE develops its standards through a consensus development process, approved by the American National Standards Institute, which brings together volunteers representing varied viewpoints and interests to achieve the final product. Volunteers are not necessarily members of the Institute and serve without compensation. While IEEE administers the process and establishes rules to promote fairness in the consensus development process, IEEE does not independently evaluate, test, or verify the accuracy of any of the information or the soundness of any judgments contained in its standards. To the maximum extent possibly, IEEE disclaims any and all liability with respect to use of or reliance upon any IEEE Standards document.

The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE standard is subjected to review at least every ten years. When a document is more than ten years old and has not undergone a revision process, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE standard.

In publishing and making its standards available, IEEE is not suggesting or rendering professional or other services for, or on behalf of, any person or entity. Nor is IEEE undertaking to perform any duty owed by any other person or entity to another. Any person utilizing any IEEE Standards document, should rely upon his or her own independent judgment in the exercise of reasonable care in any given circumstances or, as appropriate, seek the advice of a competent professional in determining the appropriateness of a given IEEE standard.

Translations

The IEEE consensus development process involves the review of documents in English only. In the event that an IEEE standard is translated, only the English version published by IEEE should be considered the approved IEEE standard.

Comments on Standards

Comments for revision of IEEE Standards documents are welcome from any interested party, regardless of membership affiliation with IEEE. However, IEEE does not provide consulting information or advice pertaining to IEEE Standards documents. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments. Since IEEE standards represent a consensus of concerned interests, it is important to ensure that any responses to comments and questions also receive the concurrence of a balance of interests. For this reason, IEEE and the members of its societies and Standards

Coordinating Committees are not able to provide an instant response to comments or questions except in those cases where the matter has previously been addressed. Any person who would like to participate in evaluating comments or revisions to an IEEE standard is welcome to join the relevant [IEEE working group](#).

Comments on standards should be submitted to the following address:
Secretary, IEEE-SA Standards Board
445 Hoes Lane
Piscataway, NJ 08854 USA

Updating of IEEE Standards documents

Users of IEEE Standards documents should be aware that these documents may be superseded at any time by the issuance of new editions or may be amended from time to time through the issuance of amendments, corrigenda, or errata. A current IEEE document at any point in time consists of the current edition of the document together with any amendments, corrigenda, or errata then in effect. Every IEEE standard is subjected to review at least every ten years. When a document is more than ten years old and has not undergone a revision process, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE standard.

In order to determine whether a given document is the current edition and whether it has been amended through the issuance of amendments, corrigenda, or errata, visit the [IEEE Xplore Website](#) or contact IEEE at the address listed previously. For more information about the IEEE-SA or IEEE's standards development process, visit the [IEEE-SA Website](#).

Errata

Errata, if any, for all IEEE standards can be accessed on the IEEE-SA Website. Users are encouraged to check this URL for errata periodically.

Official Statements

A statement, written or oral, that is not processed in accordance with the IEEE-SA Standards Board Operations Manual shall not be considered the official position of IEEE or any of its committees and shall not be considered to be, nor be relied upon as, a formal position of IEEE. At lectures, symposia, seminars, or educational courses, an individual presenting information on IEEE standards shall make it clear that his or her views should be considered the personal views of that individual rather than the formal position of IEEE.

No material posted on this site shall be interpreted as an official statement of IEEE.

IEEE Standards Material

Use of IEEE Standards material, such as the information made available here, is wholly voluntary. IEEE disclaims liability for any personal injury, property or other damage, of any

nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, or reliance upon any IEEE Standard document or material.

IEEE does not warrant or represent the accuracy or content of the material or any standard it is contained in, and expressly disclaims any express or implied warranty, including any implied warranty of merchantability or fitness for a specific purpose, or that the use of the material or standards is free from patent infringement. IEEE Standards documents are supplied "AS IS."

Should any IEEE Standards material include any brand identifiers, logos, trademarks, or source identifiers these should not be perceived as endorsements, critiques, evaluations, or indications of affiliation by IEEE.

Information contained herein may demonstrate failure events and does not necessarily reflect the actual performance of the items represented herein. Testing was conducted in a controlled environment. Do not attempt to replicate any of the tests shown.

Laws & Regulations

Users of IEEE Standards documents and materials should consult all applicable laws and regulations. Compliance with the provisions of any IEEE Standards document does not imply compliance to any applicable regulatory requirements. Implementers of the standard are responsible for observing or referring to the applicable regulatory requirements. IEEE does not, by the publication of its standards or distribution of its material, intend to urge action that is not in compliance with applicable laws, and these documents and materials may not be construed as doing so.

Intellectual Property

IEEE draft and approved standards are copyrighted by IEEE. They are made available for a wide variety of both public and private uses. These include both use, by reference, in laws and regulations, and use in private self-regulation, standardization, and the promotion of engineering practices and methods. By making these documents available for use and adoption by public authorities and private users, IEEE does not waive any rights in copyright to the documents.

IEEE Standards are developed in compliance with the [IEEE Standards patent policy](#).

IEEE materials made available on this site as made available in accordance with the applicable license agreement assigned to them. Nothing contained herein shall modify or remove IEEE's intellectual property rights in the documents and materials.

IMPORTANT NOTICE

IEEE Standards development activities consider research and information presented to the standards development group in developing any safety recommendations. Other information about safety practices, changes in technology or technology implementation, or impact by peripheral systems also may be pertinent to safety considerations during implementation of the standard. Implementers of IEEE Standards documents are responsible for determining and

complying with all appropriate safety, security, environmental, health, and interference protection practices and all applicable laws and regulations.

IEEE reserves the sole and exclusive right to update, modify, or remove the materials presented on this site without notice.
