Product: Lorry

Name: TGX: 86X, 87X

Risk type: Fire, Injuries

Category: Motor vehicles

Brand: MAN

Type / number of model: Type approval number: e4*2007/46*0233* Type: L.2007.46.005

Risk level: Serious risk

In the area of the exhaust gas turbo charger, the hydraulic piping installed for the cab tilting equipment is too short, and situated too close to the exhaust gas turbo charger. The pipes could therefore be damaged by heat and/or start to leak. A damaged pipe may cause a tilted cab to tilt back inadvertently. Furthermore, a leaking pipe can result in oil from the hydraulic system of the cab leaking and catching fire upon contact with the hot parts of the exhaust gas turbo charger.

Measures taken by economic operators: Recall of the product from end users (By: Manufacturer)

Risk level: Serious risk

Due to corrosion, the dampers of the rear door could break. This could result in the rear door failing to stay in the open position, leading to injuries to the user.

Measures taken by economic operators: Recall of the product from end users (By: Manufacturer)

Description: Passenger car

Batch number / Barcode: Manufactured from 25/11/2011 to 16/05/2016

Country of origin: France

Alert submitted by: France

Products were found and measures were taken also in: Germany

Alert number: A12/1524/17

Product: Passenger car

Name: 4008

Risk type: Injuries

Category: Motor vehicles

Brand: Peugeot

Type / number of model: e2*2007/46*0115*01, e2*2007/46*0115*02, e2*2007/46*0115*03, e2*2007/46*0115*04

Risk level: Serious risk

Water can enter the vent mechanism for the front windscreen-wiper motor. This could result in the windscreen-wiper motor becoming completely blocked because of internal corrosion. Failure of the windscreen-wipers whilst driving in rain would lead to reduced visibility for the driver.

Measures taken by economic operators: Recall of the product from end users (By: Manufacturer)

Description: Passenger car

Batch number / Barcode: Manufactured between 24 November 2011 and 12 September 2014
